

Water Well Screening

TEXAS WELL OWNER NETWORK

RESOURCES HELP LANDOWNERS PROTECT GROUNDWATER

The “Well Informed” Texas Well Owner Network (TWON) program is an educational program that gives well owners the opportunity to have their well water samples screened for common contaminants including fecal coliform, E. coli bacteria, nitrates and high salinity. The screening of the water samples is followed by a 1-hour explanation of the results, water well protection practices and focuses on wellhead protection and recommendations for remediating well contamination.

Well Informed Screening - May 22 & May 24

- **Jim Hogg County AgriLife Extension Office: 109 E. Santa Clara St, Hebbronville**
- **Jim Wells County AgriLife Extension Office: 200 N. Almond St, B110, Alice**
